## Fisheries and Aquaculture Department of the Food and Agriculture Organization of the United Nations Global aquaculture production statistics 2009

## Production level

- World aquaculture production of "food fish" reached about 55.7 million tonnes in 2009 , up by $5.2 \%$ from 2008.
- Production from aquaculture contributed $38.5 \%$ to the world total fish production in 2009.
- Aquaculture production in 2008 is adjusted to 52.9 million tonnes (up by about 0.4 million tonnes from the previous data release), due largely to the adjustment reported by some countries.

## Producing countries / territories

- Aquaculture database continued to expand to include data for those aquaculture production countries / territories that have not reported statistics properly (Haiti, for example).
- For the year 2009, aquaculture statistics from 177 countries or territories are recorded on the FAO database.

## Aquaculture species

- Internal and external inquiries show that there are still confusions about the concept of "species items" used for the purpose of aquaculture statistics. Same as for capture, the FAO aquaculture statistics database utilize taxonomic knowledge extensively, though the database is not intended for taxonomic purposes. Production data are broken down at the species, genus, family or higher taxonomic levels into statistical categories called "species items".

|  | Species items recorded for <br> aquaculture production in 2009 | Species items recorded for aquaculture <br> production at least once before 2009, but <br> without production in 2009 | Total number of recorded species <br> items in aquaculture statistics <br> database |
| :--- | :--- | :--- | :---: |
| Food fish | 357 | 129 | 486 |
| Algae | 23 | 8 | 31 |
| Non-food products | 6 | 4 | 10 |
| Total |  |  | $\mathbf{5 2 7}$ |

## The main figures

World aquaculture production quantity of "food fish" by major species group (Unit: tonnes)

| Species | 1980 | 1985 | 1990 | 1995 | 2000 | 2005 | 2006 | 2007 | 2008 | 2009 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
